FOUNDATION FOR ARMENIAN SCIENCE AND TECHNOLOGY (FAST)

Contact

Hasmik TER-GRIGORYAN
Executive assistant to CEO

🏠 <https://fast.foundation/#/>
✉️ assistant@fast.foundation

COMPANY PROFILE

Foundation for Armenian Science and Technology (FAST) is conceived as a comprehensive platform to foster technological and scientific breakthroughs in Armenia. FAST aims to revive the country's strong Science, Technology, Engineering and Mathematics (STEM) traditions, establishing a favorable regime for the innovative environment, fostering science and technology education, and actively developing a venture capital ecosystem.

One of the most pivotal tasks of FAST is to engage tech and scientific communities in raising the profile of Armenia as a hub for technological and scientific discoveries and developments.

COMPANY PROFILE

Innovation and Technology Development Office (ITDO), serves to set up and nurture the platforms to boost high-impact research through both researcher efforts as well as in collaboration with other parties including universities, industry, government and the like locally and internationally. Besides, we strive to manage and maintain PolyU's IP Portfolio covering both patents and non-patent IP and explore in greater depth the exploitation of IP in terms of utilization, trade and collaborations. We also promote a consistent understanding about PolyU's stance and principles laid down towards knowledge transfer, innovation and technology development and foster the formation of strategic alliances on technology development leveraged through collaborative research as one of the means for devotions in high-impact translational research both on an individual and a multi-disciplinary basis aiming at delivering high impacts on the society. Moreover, knowledge transfer refers to the process in which knowledge is developed and further transforms until it reaches the maturity for application and utilization. It stimulates and materializes the University's interactions with the community through propelling research efforts and uplifting technological achievements throughout the continuum from innovation to application and serves to further tighten the bond and enhance two-way communication between the University and the society. It has marked numerous footprints in our history and spared no efforts in sustaining its long-established eminence particularly in this area of excellence. Our application-oriented innovation and technology development serves to address people's unmet needs and the community's advancement through collaborative research and knowledge transfer to propel high-impact deliverable for the society and we are keen to foster partnerships among universities, government, industry and public at large and minimize the gap in technology readiness between research outcomes and society's needs.

We are keen on encouraging the research community

to come up with innovative ideas and high-impact research and dedicated to fostering multi-faceted platforms to strengthen ties between PolyU and potential international collaborators, thereby translating excellence into continuous improvement of human life through significant technological advancements. We serves to establish and promote a series of interactive communication platforms focusing on engaging potential collaborators at early stages of R&D projects to bridge the gap in technology readiness and proactively soliciting researchers' and collaborators' interest on collaborative research, establishing various schemes to draw in ideas and facilitate projects; and actively organizing and participating in outreaching and networking activities to promote our research capabilities and expand our network. We are dedicated to identify initiatives on high-impact projects and facilitate to offer assistance in project and government funding opportunities and provide advice on subjects regarding compliance, operations and other matters related to accelerating innovative technologies development and applications.

COMPANY PROFILE

The mission of Business Incubator BIOS Osijek is to support development of SMEs by provision of business-related services and business facilities in the most critical development phases of SMEs (idea development, start up etc.).

The main activities that BIOS conducts in order to fulfill above mentioned mission are:

- organizational and business consulting assistance,
- entrepreneurship promotion and networking,
- business skills development,
- know-how and technology transfer,
- preferential business facilities lease space.

BIOS competences are:

- highly educated personal with SME development experience,
- long history (over 10 years) of EU projects implementation,
- established network of experts in SME development field,
- broad cooperation with other similar SME support organisations,
- support to local and regional governments in creation of SME development strategies.

Relevant for the project, BIOS thematic competences and experiences are focused to BIAT 2019 as follows:

- Active participation in Osijek Software City: OSC is association that gathers export oriented ICT companies and other ICT specialists. Their goals are: raising attractiveness of developer vocation, increasing competitiveness of ICT experts and stimulate entrepreneurship within ICT sector.
- Project Hardware Lab: Procurement of specialized equipment intended for prototype development as well as early production. Equipment will encompass 3D printers and scanners, CNC machines, laser engraver etc. It will be used by ICT companies oriented to hardware components development.
- Organization of ICT events like hackathons (IoT

H., OSC H., IEEE Extrem H.), conferences (Kulen days - regional conference of MS developers) and workshops on programming, automation, robots etc., especially for scholars (STEM Kitteens)

BYTE LAB GRUPA D.O.O.

Contact

Matija PUSKAR
CEO

🏠 www.byte-lab.com/
✉ puskar@byte-lab.com

COMPANY PROFILE

Byte Lab Group is a company specializing in product development. Together with the sister company B.L.Manufacturing specializing in production, we have delivered to customers more than 200 different projects in the last eight years. Over 95% of revenue from both companies comes from exports, and most revenue comes from the Benelux and DACH markets. With our experience, we provide clients with a painless product development process from the idea to high-volume production. Due to the fact that the entire development and production of in-house products, the average time from the initial idea to placing on the market is on average less than 9 months. The company also possesses test verification equipment that enables pre-certification testing even during development, and our senior engineers have over ten years of electronics development experience. On the side of the technology the company has experience with the implementation of Bluetooth, WiFi, GSM, LTE, NB-IoT, LoRa, Sigfox, Zigbee, RFID and NFC wireless technologies.

COMPANY PROFILE

At Precog Innovation Partners, we are a Cross-border Innovation Management, Enterprise-Startup Co-creation and an Early-stage Family Investment firm focused on incubating and co-creating with globally disruptive tech-driven innovations across Cleantech and Sustainability relevant for solving some of the large Indian problems. On the demand-side of innovations, as Co-Creation Partners with 30+ large Indian business families, we are focused on technology commercialization in the Indian markets - co-creating, incubating and co-investing into globally disruptive technologies in pursuit of building a structured approach to Open Innovation. We have also been putting together leadership teams for these families to manage Open innovation, New Ventures and Strategic investments.

On the supply-side of innovations, as Venture Partners for global entrepreneurs and innovators, we envision solving complex problems and creating extraordinary impact at scale by joining hands with ambitious founders and industry leaders to facilitate co-creation of sustainable ventures together with its strategic partners across industry sectors. We work with 15+ innovation-led entrepreneurial ecosystems across US, Europe, SE Asia, Canada and Israel in domains of Energy, Environment and Infrastructure. Our sub-themes include - Energy (Clean energy and Renewables tech), Environment (Air, Water, Energy Efficiency, Energy Storage) and Infrastructure (Smart Mobility & Clean Transportation, Industrial IOT, Edtech with particular focus on skill development infra) sectors.

COMPANY PROFILE

When transformation is the mantra, information is power. For over 20 years, ASAPP Info Global Group, a true thought leader, has radically transformed the B2B (business-to-business) universe with its dynamic offerings in the print, Web and events space. Its array of award-winning, industry-leading, special-interest publications like CONSTRUCTION WORLD, EQUIPMENT INDIA, INFRASTRUCTURE TODAY, INDIA CEMENT REVIEW span the Construction, Infrastructure sectors while INDUSTRIAL PRODUCTS FINDER, INDIAN TEXTILE JOURNAL and AUTOMOTIVE PRODUCTS FINDER span the Engineering Space, spanning 7 countries. Going beyond print, the Group provides a 360° information experience through its bouquet of industry recognition awards include the CONSTRUCTION WORLD ANNUAL AWARDS for construction, equipment and building material companies; the CWAB AWARDS for top architects and builders; and several others. Being future-ready, its SMART CITIES COUNCIL INDIA is a consortium of Smart City stakeholders. The Council acts as an advisor and market accelerator, promoting the Government's move to smart, sustainable cities by providing stakeholders relevant information and latest updates, gathering and disseminating resources, collating industry data, and showcasing achievements in this segment. What's more, well before corporate social responsibility became a buzzword for India Inc, ASAPP Global Group realised its responsibility to the greater community and initiated FIRST -Foundation of Infrastructure Research Studies Training - a not-for-profit trust, in 2003. FIRST Construction Council works for promoting the best practices for the construction and infrastructure industry. Indeed, ASAPP Info Global Group, a true pioneer, has established its leadership across the gamut of operations, and the numerous national and international awards and accolades are testament to its leadership position across industries.

COMPANY PROFILE

On Sept. 28, 2010, then-President Dmitry Medvedev signed a law "On the Skolkovo Innovation Center," giving rise to the project's managing entity, the not-for-profit Skolkovo Foundation.

Charged with providing the catalyst for the diversification of the Russian economy, the Skolkovo Foundation's overarching goal is to create a sustainable ecosystem of entrepreneurship and innovation, engendering a startup culture and encouraging venture capitalism.

The Skolkovo Foundation identified five key areas of potential growth: energy efficiency, strategic computer technologies, biomedicine and agratech, nuclear technologies and space technologies.

To achieve this the Foundation is overseeing the creation of the Skolkovo Innovation Center, composed of companies and startups, developing innovative technologies (currently numbering over 1,900), a Technopark, the Skolkovo Institute of Technology (Skoltech), a new graduate research University established in collaboration with the Massachusetts Institute of Technology, and Skolkovo city, located near Moscow. Together these entities will establish a vibrant ecosystem of technology innovation and entrepreneurship. Thirty of the world's most successful corporations, including Boeing, Cisco Systems, ENEL; ENI; EADS, GE, Johnson & Johnson, IBM, Intel, Microsoft, Siemens, Nokia, Samsung etc. have already recognized the opportunity Skolkovo presents, having signed R&D partnership agreements with the Foundation.

Dozens of innovative projects developed by Skolkovo startups have found success in international markets.

Surveys have showed that Skolkovo startups are three times more likely to attract investment than non-members. In August 2013, the Skolkovo project was chosen for

COMMERCIAL BANK OF DUBAI*Contact*

Ali Raza DHARAMSEY
Senior Relationship Manager

🏠 www.cbd.ae

✉ ali.dharamsey@cbd.ae

COMPANY PROFILE

Commercial Bank of Dubai (CBD) was established in 1969 by an Emiri Decree issued by His Highness, the late Sheikh Rashid bin Saeed Al Maktoum. The bank started out as a joint venture between Commerzbank, Chase Manhattan Bank, and the Commercial Bank of Kuwait, with a minority stake held by a few UAE businessmen.

In 1982, CBD reached a major milestone when it transformed into a national shareholding company, with a major operational restructuring and an increase in capital base. This represented a major turning point in the bank's history, when the government of Dubai became a majority shareholder.

Over the decades, CBD has transformed into a progressive and modern banking institution. We are supported by a sturdy financial base led by a strong and stable management, as proven by our clients who have stood with us over the years.

Today, CBD is in a position to offer a wide range of retail and commercial banking products and services, in both conventional and Shariah-compliant formats, with a network of 26 branches and over 210 ATMs throughout the UAE.

🏠 www.biosaline.org/content/icba-glance.

✉ z.Hammami@biosaline.org.ae

COMPANY PROFILE

ICBA is an international, non-profit agricultural research center established in 1999 through the visionary leadership of the Islamic Development Bank (IDB), the Organization of the Petroleum Exporting Countries (OPEC) Fund, the Arab Fund for Economic and Social Development (AFESD), and the Government of the United Arab Emirates (UAE).

Originally focused on the problems of salinity and using saline water for irrigated agriculture, ICBA has evolved over the years into a world-class modern research facility with a team of international scientists conducting applied research and development to improve agricultural productivity and sustainability in marginal and saline environments.

Currently, ICBA is working on a number of technology developments, including the use of conventional and non-conventional water (such as saline, treated wastewater, industrial water, agricultural drainage, and seawater), water and land management technologies and remote sensing and modeling for climate change adaptation.

TECHNOLOGY COLLABORATION CENTER (TCC), HOUSTON

Contact
Sudhir PAI
Chairman - TCC

🏠 <https://techcollaboration.center/about/>
✉ paiexpress100@gmail.com

COMPANY PROFILE

The TCC concept arose after a series of high level meetings, focusing on how the community can more fully utilize the technological capabilities in the greater Houston region. A shared interest among our communities is in the development of more efficient interdisciplinary approaches to real world problems, with the goal of bringing those solutions into practice and to the market.

And, while the initial focus on planning for the collaboration center was on building more partnerships within the Space, Medicine and Energy communities in the Houston area, the mission of the TCC was expanded to provide support for any technology and industry, involving organizations from any location.

In 2015, the TCC began operations as an independent 501(c)(3) nonprofit organization, launching two programs, a Technology Workshop series and the Collaboration Concierge Service. From 2015 through 2017, the TCC has hosted 10 workshops.

Through the Collaboration Concierge Service, the TCC helps organizations find potential collaboration partners, to help in solving difficult technology problems.

As an independent 501c3 non-profit organization, the TCC was established to be a member-driven organizations, with member representatives serving on the TCC's Board of Directors and Advisory Council, ensuring the TCC's strategy aligns with the needs of members and the community.

Shell, Schlumberger and various other organisations are members of this consortium.
